NESTLE WOODEN TRIPOD TR-246-7

NO COMPROMISES IN ROBUSTNESS AND VISIBILITY

13719001

Our heavy-duty wooden tripods are made of high-quality wood.
A special oil treatment prevents water ingress and the resulting swelling of the wood.
Wooden tripods have very good damping properties, so that vibrations are very well absorbed.
The material remains very stable even under direct sunlight, so that measurements are not affected.
All fittings on this tripod are anodised in bright red for better visibility.
This tripod is equipped with a triangular head plate.
The self-locking mechanism secures the tripod legs when carrying and during transport and prevents unintentional unfolding, thus efficiently avoiding transport damage and injuries.

YOUR ADVANTAGES IN APPLICATION

High-precision measurements with theodolites, total stations and robotic stations.
Excellent visibility due to bright red fittings.
Excellent damping properties.

Technical data	NESTLE wooden tripod TR-246-7
working range at 1 m tip distance	90 - 170 cm
Transport dimension	107 cm
Connection	5/8''
Clamping	Clamping screw
Colour of wooden elements	yellow
Fitting colour	luminous red
Head plate	flat, metal, triangular
Weight	6.400 g

ACCESSORIES

Scope of delivery: wooden tripod, cover for head plate

Optional we recommend:
Carrying bag, item no. 13931001
