NESTLE COMBINATION POLE 350 PK-1

DOUBLELY TELESCOPIC COMBINED POLE MADE OF CARBON

14031000

Prism and antenna pole for all types of surveying in construction and cadastre.

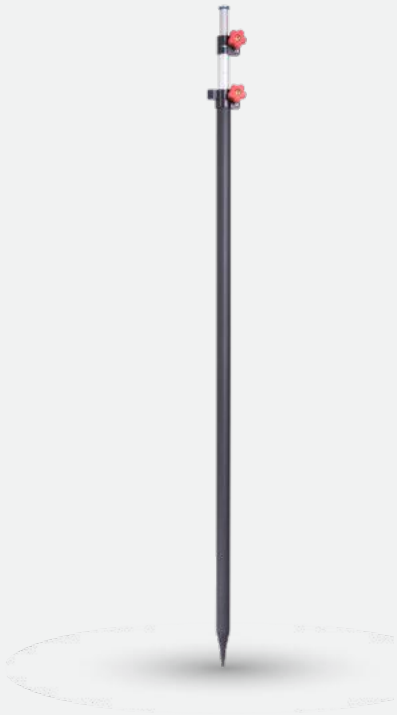

Simplest operation: set the correct height with one hand, clamp with the other.

With a height of up to 3,50 m, the pole is ideally suited for measurements in hilly- terrain or in built-up and heavily vegetated areas. Inner tube shock-absorbed - protects prism and pole.

An adapter is included in the scope of delivery. This allows the scale offset to be adapted to the tilt axis dimension of your prism.

For GNSS measurements, you can optionally obtain the GNSS adapter, item no. 14934000. This brings the scale offset to zero, as is customary for GNSS antennas.

A special laser engraving process makes the scale indestructible.

YOUR ADVANTAGES IN APPLICATION

Carbon for comfortable working, even at low temperatures
Maximum working height 3,50 m.

Technical data	Combination Pole 350 PK-1
Clamping	Screw clamp
Diameter	Outer tube 32 mm, inner tube 25/18 mm
Work area	151-365 cm
Transport dimension	138 cm
Weight	1.300 g
Connection	Female M12 with adapter
Special feature	Double telescopic

ACCESSORIES

For working with our prism poles, we offer bipods, tripods and prisms.
Bipod for poles with Ø 08-12 mm and 22-32 cm, Art. No. 14803001
Tripod, Art. No. 14817001.
Prism, Art. No. 14100000.
Bag for carbon poles up to 143 cm, item no. 14977001.
