NESTLE PRISM AND GNSS POLES ACCESSO-RIES

ALWAYS USE ORIGINAL ACCESSORIES

NESTLE tip with carbide pin, Art.-No: 14984000

The tip consists of 71140023 end tip with carbide pin and 71140024 5/8" tip with M8 connection. 71140023 + 71140024 are available as spare parts, so a worn carbide pin can be replaced easily and quickly. Note: For self-assembly accessory only.

14984000 can replace the standard tip on the following poles:

- Art.-No. 14010000 PP-2
- Art.-No. 14011000 PP-2-H
- Art.-No. 14028000 PG-2
- Art.-No. 14030000 PG-5
- Art.-No. 14031000 PK-1
- Art.-No. 14032000 PR-1
- Art.-No. 14033001 PO-9
- Art.-No. 14034000 PT-9

NESTLE clamp compass for poles NCC-1, Art.-No: 14813000

Controllers on prism or GNSS poles often obscure the view of the pole spirit level. The NCC clamp unit can be attached at any height on the pole, so that an optimal view of the circular spirit level is always possible.

- Circular spirit level and compass in one clamp unit.
- Compass for orientation during staking out.
- Easily rotatable.

NESTLE tip with screw-on sand plate, Art.-No: 14956000

- Can be used with all carbon prism poles with removable tip
- Advantage: sand plate always included, without it being lost.
- Sand plate 60 mm, weight 95 g.

NESTLE sand plate, screw-on, Art.-No: 14919000

Prevents the plumb pole from sinking into soft ground.

This ensures more accurate recording of the heights of your measurement points.

- Base plate 65 mm.
- Weight 130 g.

NOTES AND ACCESSO-RIES

Use only original products from Gottlieb Nestle for all surveying tasks.
On the following pages:

- Extensions
- prism adapters
- tripod legs
- controller holder systems, for ergonomic working with prism and GNSS poles
