NESTLE MINI BIPOD P2-MINI

STORAGE AID FOR POLES, FOLDABLE SUPPORTS

14820000

With the mini bipod, it is possible even during rough daily use to easily and safely set aside the GNSS antenna - or the prism pole without damaging or dirtying the attached prism, the antenna or the Controller.

The mini bipod also provides the pole with a secure stance when leaning against a wall or partition.
Rubberised leg ends - no scratching or slipping on sensitive surfaces such as glass.
The support legs are foldable and have a stop to prevent over-extension when stored. This also ensures secure transport. Clamping screw for prism and antenna poles with 22 mm - 32 mm.

YOUR ADVANTAGES IN APPLICATION

Protects the prism, the antenna and the Controller against contamination and damage on difficult terrain.
The mini bipod strut is very lightweight, easy and flexible to mount.
Particularly short transport size.

Technical data	NESTLEMini double strut P2-mini
Leg length	17 cm
Weight	260 g
Pole clamp	Double C with screw clamp
Legs	Foldable with stop

ACCESSORIES

Always rely on the quality of Gottlieb NESTLE GmbH for all prism and GNSS poles. In the PRODUCTS | PRISM AND GNSS POLES chapter from page 103, you will find the right pole for your surveying tasks.
